

Patent Leather Polishing

1. Introduction:

MG-677 is a patent leather polish with surfactant and organic mixtures developed for cleansing and polishing of PU/PVC and cowhide patent leather.

An active solution containing special ultrafine particles that restores and increases shininess; it forms a long lasting protective antistatic film that reduces dust adhesion and leaves no trace of fingerprints or marks to patent leather.

MG-677 is a rub on polish with no dilution required for simple application.

- * Abrasion resistance
- * Durability
- * Antistatic
- * Enhances shininess
- * Excellent sense of touch

2. Chemical-physical characteristics:

Appearance:	Colorless Liquid.
Solidity (%):	5 +/- 0.5
Density (Kg/m3):	0.66 +/- 0.005
Viscosity (CPS):	<30

3. Available Colors:

MG-677 Clear

4. Application procedure:

Rub evenly throughout the patent leather area with a clean cloth. Finish up with a separate clean cloth. (DO NOT apply with fall off cotton cloths)

5. Storage:

The product may be stored with its container tightly closed in a well-ventilated place at a temperature below 40°C. Sealed containers have a service life of 5 year.

6. Package: 60L PE Drum (45 Kg)

Safety:

When handling this product the instructions set out in the safety data leaflet must be observed. The relevant safety and precautionary measures for hygiene in the workplace must also be followed when working with chemical products.

Observations:

The instructions given in this publication are based on the current stand of our knowledge and experience. This does not presuppose any judicial guarantee concerning certain properties nor their suitability for any application in particular. Given the many influences that may occur during the handling and use of our products, the persons handling or transforming them are not exempt from carrying out their own controls or tests. All those receiving our products will be responsible for observing all existing patent rights as well as all current laws and regulations.
